

Upgrade Tool Operation Manual

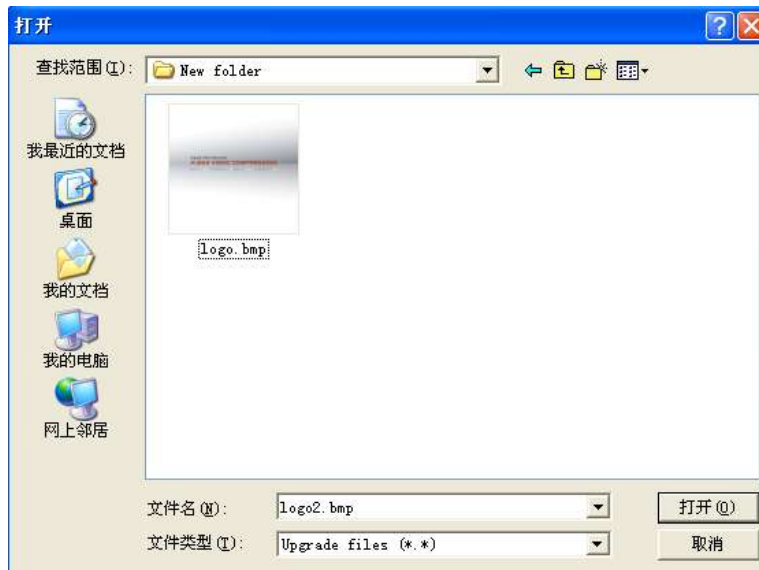

1. Find Upgrade Tool in the CD and install it, then run it, see below picture:

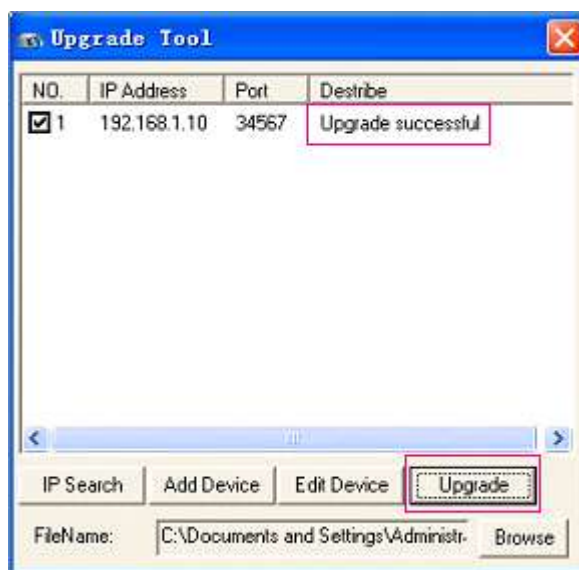

2. Click "IP Search", select the DVR's IP address and port, then click "Browse", see below pictures:

3. To Browse the Logo (bmp), see below picture:

Then click "Upgrade", finally you will see Upgrade successful, at the same time the DVR is rebooting and you can see your LOGO now like below pictures:

**Please Note: The firmware upgrade process is the same as the
Logo upgrade.**
